

FULTON COUNTY
CONSERVATION DISTRICT

2021 TREE SALE

DEADLINE FOR ALL ORDERS: FRIDAY, MARCH 19, 2021

HOW TO ORDER:

To place an order, remove the 3-page order form, complete, and mail it to the address listed on the form or drop the order form off at the District Office. Full payment must accompany all orders. We accept checks, money orders, or exact cash for payment. If paying by check, please make the check payable to "FCCD". **Add 6% sales tax unless you have a sales tax exemption form on file with the District.** Upon receipt, the District will mail you a sales receipt with an itemized list of your order, as well as a reminder regarding pick-up.

WHEN & WHERE TO PICK-UP:

DATE: FRIDAY, APRIL 16, 2021

TIME: 8:00 AM - 4:00 PM

**LOCATION: FULTON COUNTY FAIRGROUNDS, 888 Lincoln Way East,
McConnellsburg, PA 17233**

- The Fulton County Conservation District will not be responsible for orders picked up after April 16th, unless previous arrangements have been made. **No refunds will be given for unclaimed orders.**
- **All plant material is bare root; therefore, we cannot guarantee survival once you take possession.**
- **All profits from the tree sale are used to support environmental education efforts in Fulton County.**

***Don't see what you want? We may be able to get it for you!
Contact Dawn Harnish at 717-325-6088 regarding special orders.
Deadline for special orders is February 26th, but inquire early!***

WHITE OAK, 12-18"	\$25.00		\$48.00		

TOTAL DUE DECIDUOUS TREES:

FRUIT & NUT TREES

Apple, Fuji Red

Semi-dwarf on EMLA 111 rootstock. 5/8-3/4 inches in diameter, bare root. Red skinned version of original Fuji. Very sweet, firm, crisp and juicy.

Apple, Goldrush

Semi-dwarf on EMLA 111 rootstock. 5/8-3/4 inches in diameter, bare root. Medium-sized, yellow-green, round, conic fruit. Tart flavor at harvest, but mellows to excellence after 6-8 weeks in storage. Best known for remarkable keeping qualities and resists oxidation when cut. Scab and mildew resistant, but susceptible to cedar apple rust.

Apple, Honeycrisp

Semi-dwarf on EMLA 111 rootstock. 5/8-3/4 inches in diameter, bare root. Should be cross-pollinated with another apple variety that blooms at the same time. Excellent eating, cooking, and keeping qualities. Very crisp flesh. Fruit is mottled red over yellow ground color. Scab resistant, no problems with fire blight.

Cherry, Jubileum (Sour)

5-foot bare root. 5/8 to 3/4 inches in diameter. Dark red, tart fruit with dark flesh. Considered the standard for pie cherries. Spreading, self-fertile.

Cherry, Montmorency (Sour)

5-foot bare root. 5/8 to 3/4 inches in diameter. Dark red, tart fruit with dark flesh. Considered the standard for pie cherries. Spreading, self-fertile.

Cherry, Hedelfingen (Sweet)

5-foot bare root. 5/8 to 3/4 inches in diameter. Large, firm, black fruit. Exceptional quality. Used for fresh eating, freezing or canning. Vigorous, healthy, early-bearing and reliably productive.

Cherry, Lapins (Sweet)

5-foot bare root. 5/8 to 3/4 inches in diameter. Firm fruit as large as Bing. Excellent quality and rich flavor. Crack resistant. Heavy producer. Self-fertile.

Nut, Chinese Chestnut

4-5 foot bare root. Resistant to chestnut blight. Nut production begins in 3-4 years. Requires two for pollination and best nut production. Prefers acid, well-drained, loamy soil.

Nut, English Walnut

4-5 foot bare root. Carpathian strain. Fast growing tree with dark green foliage. Mature height of 35-45 feet. Nut production should begin in 3-5 years. Prefers deep, fertile, well-drained soil. Two trees should be planted for best pollination and nut production.

Peach, Blushingstar

5-foot branched bare root. 5/8-3/4 inches in diameter. Ripens early. Round fruit with 90% bright red blush. Hardy tree resists bacterial spot.

Peach, Contender

5-foot branched bare root. 5/8-3/4 inches in diameter. Produces medium to large freestone, red-blushed, yellow fruit. Great for canning or fresh eating. Very cold hardy. Medium to good resistance to bacterial spot.

Peach, Red Haven

5/8-3/4 inches in diameter, bare root. Standard of all early peaches. Flesh firm, smooth textured and of good flavor. Highly versatile. Winter hardy.

Pear, Bosc

5/8-3/4 inches in diameter. 5-foot bare root. Medium to large pear. Golden brown in color and often russeted. Has a more firm, dense flesh than most other pears, so ideal for baking, broiling or poaching. But excellent for fresh eating as well.

Pear, Seckel

5/8-3/4 inches in diameter, 5-foot bare root. Also known as "sugar pear." Small pear, but one of the best quality dessert pears. Tree vigorous, hardy, and productive. Self-fertile but benefits from cross-pollination (but not with Bartlett).

SMALL FRUITS & VEGETABLE PLANTS

Blueberry, Bluecrop

3 year plants. Vigorous, upright growth. Reaches 4-6 feet tall. Medium-large, light blue fruit is firm, crack resistant, with good sub-acid flavor. Very hardy. Self-pollinating. (mid-season)

Blueberry, Blueray

3 year plants. Large, medium-blue fruit. Very sweet, slightly tart, aromatic flavor. Excellent quality. Self-fruitful. (early-midseason)

Blueberry, Chandler

2-3 year plants. Largest blueberry. Excellent flavor. Very productive. Will produce up to 15 pounds per plant. Ripens mid-season. Self-fertile.

Blueberry, Herbert

2-3 year plants. Vigorous, open-spreading, consistently productive. Berry large to very large. Flavor very good, aromatic. (late)

Blueberry, Sweetheart

3 year plants. Unique hybrid produces two crops—one early in the season and a smaller late second crop. Superior flavor, sweet, firm, medium to medium-large berries.

Asparagus, Jersey Knight

Male plants (no energy goes to seed production). Vigorous growth. Produces heavy yields of large spears. Will out produce older varieties.

Asparagus, Purple Passion

Its special, attractive purple color, flavor, and tenderness distinguishes this variety from others. "Purple Passion" is a cultivar which produces attractive purple spears which have a mild, nutty flavor and are reputedly sweeter than most other asparagus varieties. Provides

excellent purple color if added to salads raw, but turns green when cooked.

Strawberry, Allstar

June bearing. Very large. Firm, mild, sweet flesh. Ripens mid-season. Resistant to many diseases.

Strawberry, Earliglow

June bearing. Medium to large. Exceptional flavor. Ripens early. Resistant to many diseases.

Strawberry, Jewel

June bearing. Large to very large fruit. Excellent, slightly aromatic flavor. Ideal for desserts and freezing.

Strawberry, Seascape

Ever bearing. Medium size fruit. Excellent for fresh eating and freezing.

Strawberry, Sparkle

June bearing. Late mid-season. Medium to large fruit. Does well on most soils. Flavorful, high quality fruit.

Strawberry, Surecrop

June bearer. Medium to large fruit. Excellent, slightly tart flavor. Resistant to many diseases. Unusually vigorous. Good on poor or dry soil.

EVERGREEN TREES

Eastern White Pine

Fast growing. Can tolerate dry, rocky soils, as well as wet, swampy areas. Ideal for specimen planting, shade, windbreaks, and Christmas trees. Can tolerate some shade.

Norway Spruce

Thrives well in average soil conditions, but prefers some moisture. Excellent for shelters and windbreaks. Fast growth. Spreading branches with drooping twigs. Full sun to partial shade.

White Spruce

Long lived, but relatively slow growing, can reach 60' tall. Excellent for windbreaks and shelterbelts. Dense pyramidal growth and retains lower branches. Does well in full sun, but will tolerate some shade. Can endure heat and drought. Resistant to deer browsing.

Arborvitae

Handsome, pyramidal evergreen. Very hardy. Grows in a variety of soils but best in loamy, moist soils. Excellent for screens and tall hedges. Easily sheared.

Canadian Hemlock

Eastern (Canadian) Hemlock. This evergreen prefers shade but will do well in full sun. Likes moist, organic, well-drained soil. They stand shearing and moderate pruning, so can be used for tall hedge.

DECIDUOUS TREES

American Elderberry

Hardy, native shrub that grows 6-12 feet high and can spread to 10 feet. Green foliage with numerous large clusters of white flowers in

June and July, followed by purplish-black edible fruits in August and September. Important food source for birds. Grow well in full sun and partial sun. Good choice for riparian buffers.

American Persimmon

Native tree, grows to 60 feet. Does well in difficult to extremely dry soils. Fragrant white flowers in spring, yields edible fruit in fall.

American Redbud

Small understory tree, producing pink blooms on bare stems in early spring. Foliage large and heart shaped.

Hackberry

Hardy, native tree. Tolerant of wide variety of soils and conditions. Some shade tolerance. Interesting warty, irregular bark that becomes furrowed with maturity. Fruit is popular food for birds and small mammals.

Paw Paw

Native, medium-sized, tropical looking deciduous tree. Grows rapidly. Produces nutritious, edible fruit. Shade tolerant, but fruit production greatest in full sun.

Pin Oak

Forms a symmetrical pyramidal head with drooping branches. Bright green leaves turning yellow to radiant red in autumn. Prefers somewhat moist soil. A fast growing tree with light to dark, grayish-brown bark. Mature height of 75 to 80 feet.

Red Oak

Grows best in sandy to rich loamy soil in full sun, but tolerates wide range of conditions. Fastest growing of all oaks. Valuable timber tree. Prefers full sun.

Red Osier Dogwood

Large shrub dogwood with bright red stems. Berries white to gray at maturity and preferred by many birds. Often used for streambank plantings. Prefers moist soils.

River Birch

A native birch to the river bottoms, but does well in many soils. Reddish brown, exfoliating bark. Resistant to bronze birch borer.

White Oak

Pennsylvania native oak. Grows 50-80 feet in height. Grows best in deep, loamy, well-drained soil.
